Abstract: EPA promulgated Federal Implementation Plans (FIPs) under the Clean Air Act for Indian reservations located in Idaho, Oregon, and Washington in 40 CFR part 49 (70 FR 18074, April 8, 2005). The FIPs in the final rule, also referred to as the Federal Air Rules for Indian Reservations in Idaho, Oregon, and Washington (FARR), include information collection requirements associated with the fugitive particulate matter rule in § 49.126, the woodwaste

burner rule in § 49.127; the rule for limiting sulfur in fuels in § 49.130; the rule for open burning in § 49.131; the rules for general open burning permits, agricultural burning permits, and forestry and silvicultural burning permits in §§ 49.132, 49.133, and 49.134; the registration rule in § 49.138; and the rule for non-Title V operating permits in § 49.139. EPA uses this information to manage the activities and sources of air pollution on the Indian reservations in Idaho, Oregon, and Washington. EPA believes these information collection requirements are appropriate because they will enable EPA to develop and maintain accurate records of air pollution sources and their emissions, track emissions trends and changes, identify potential air quality problems, allow EPA to issue permits or approvals, and ensure appropriate records are available to verify compliance with these FIPs. The information collection requirements listed above are all mandatory. Regulated entities can assert claims of business confidentiality and EPA will address these claims in accordance with the provisions of 40 CFR part 2, subpart B.

Respondents / Affected Entities: Entities potentially affected by this action include owners and operators of emission sources in all industry groups and tribal, federal, and local governments, located on the identified Indian reservations.

Obligation to Respond: Mandatory.

Estimated Number of Respondents: 1,681.

Frequency of Response: Annual and on occasion.

Estimated Total Annual Hour Burden: 5,069. Burden is defined at 5 CFR 1320.03(b).

Estimated Total Annual Cost: \$330,752. This includes an estimated labor cost of \$330,752, and no capital investment and operation and maintenance costs.

Changes in the estimates: There is a decrease of 1,176 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is the result

of a number of changes. It reflects adjustments to the burden estimates for this collection using consultation input, historical data, and experience with implementing the FARR. Some components of the burden estimates increased and some components decreased. In most cases, the burden estimates decreased based on input from the source consultations. For some provisions the estimates of the number of respondents decreased. Some estimates changed based on additional information EPA has gained through implementing the rules.
